### USAI Lighting's Max Output LED

USAI Lighting presents its Max Output LED light that delivers up to 5200 lumens with the 6" aperture model and over 3000 lumens from the 4.5" aperture model. Max Output is designed to provide color consistency, compatibility with multiple dimmer types, beam spread options from 10° to 80°, and over 70% energy savings and a 50,000 hour lamp life. Both trimmed and trimless fixtures in various finishes and colors are available.

### USAI Lighting's NanoLED

USAI Lighting's NanoLED Multi recessed fixture features up to four independently lockable and 40° x 40° adjustable sources, with more than seven different beamspread options and a variety of optical accessories. Any configuration chosen is available in multiple trim or trimless finishes, complete with a wide range of dimming driver options and emergency. Up to 1150 useful lumens are delivered from each head, and colors are accurately illuminated with fixture-to-fixture color consistency within a 2-Step MacAdam Ellipse and 80+ or 90+ CRI options.
