

## CLOSE-UP on Lighting

**C:** NanoLumen is a recessed fixture that marries optics and performance features with the small aperture for metal halide lamp sources. Designed around a T4 ceramic metal halide lamp source, NanoLumen's 2.5-inch aperture fuses discreetly with interior ceiling planes. This allows for precise yet flexible point source lighting in any installation. The fixture offers a variety of features, including hot aiming with true center-beam optics, aiming memory, and interchangeable reflectors. **NanoLumen by USAI Lighting. Circle 203.**
