NEW & IMPROVED

To the Max

The high-ceilinged Septodont Lecture Hall at New York University's College of Dentistry is illuminated to the max, thanks to BeveLED fixtures featuring MaxOutput technology, which delivers up to 5200 lumens from a compact 6-in. aperture. The fixtures can be ordered with multiple beam-spread options and are compatible with multiple dimmers to meet the needs of spaces with ceilings ranging from 15ft. to 50ft.
