Trimless Acoustical Lighting

The look of drywall in acoustical ceiling panels

Making the Impossible Possible

USAI Lighting and Armstrong® Ceiling Solutions collaborate to rethink ceilings and make the impossible possible with trimless lighting in acoustical ceiling panels. Armstrong Ceiling Solutions' precut ceiling panels are designed exclusively for perfect placement of USAI's recessed, LED light fixtures to create a consistently clean, trimless finish with a drywall appearance.

→ Traditionally, acoustical ceiling panels are manually cut and require trimmed recess fixtures to cover up jagged edges.

Armstrong's factory-prepared, center-cut panels paired with USAI's snap-in mounting system provide for perfect lighting and ceiling integration every time.

TRADITIONAL OPTION
For Acoustical Ceiling Panels

NEW
Standardized Integrated Solutions

Easy 3-Step Installation

1 Place Precut Panel Into Grid 1st
Cutting + Waste Eliminated

2 Place Fixture with Snap-In Mounting System - Seismically Rated Self Leveling + Centering

3 Insert USAI's Trimless Acoustical Trim
