Center Cut Panels bring Drywall Look to Suspended Ceiling Application

The look of timeless drywall ceilings in a suspended ceiling system is possible with Armstrong's Center Cut panels. Designed to seamlessly integrate with trimless downlights, the panels feature a monolithic look with crisp, integrated lighting and pre-cut downlight opening available for USAI Lighting's BeveLED Mini and BeveLED 2.2 square or round lights. They also boast the added benefits of accessibility and acoustical performance, fast and easy installation, and no on-site panel cuts needed. All panels are available in square lay-in and rectangular versions and are offered in four of Armstrong product lines, including Calla, Ultima, Lyra PB and Optima PB.
