

BUILDING DESIGN + CONSTRUCTION

1. LIGHTING FOR REHEARSAL SPACE

USAI LIGHTING

Project: Voxman Music Building, University of Iowa, Iowa City. **Problem:** A 2008 flood ruined the Voxman Music Building, causing the university to rebuild and relocate the facility. The new space required functional, well-lit performance and rehearsal spaces. **Solution:** USAI Lighting's BeveLED 2.1 Classic White fixtures were incorporated into rehearsal spaces due to their high intensity and ability to withstand the constant and intense sound waves produced by the instruments. **On the team:** HLB LA (lighting designer).
