### COME INTO FOCUS with Sliver LED from USAI Lighting

on July 1, 2016 in LED Lighting Luminaires and Fixtures

Article Type: Press Releases

COME INTO FOCUS...In a world full of distractions, the newly developed SliverLED from USAI Lighting elegantly spotlights works of art or display case products with a single, consistent cascading beam of light. The highest performing recessed LED pinhole available, it delivers more than 1,200 lumens at 90 lumens per watt from a minuscule 1-3/4" aperture, precisely illuminating areas within any residential, commercial or retail space. And, with a lower housing profile than most other pinhole fixtures at 4-1/8", SliverLED can be easily installed in any tight plenum space. USAI offers SliverLED in a variety of trims, including white, metalized gray, statuary bronze and flat black, plus with a variety of primers to match custom ceiling colors.
