

101 Top Products for 2019

Building Design+Construction readers and editors select their top building products for the past 12 months in the fourth-annual 101 Top Products report.

101 TOP PRODUCTS | DECEMBER 16, 2019 | BD+C STAFF

The products selected for *Building Design+Construction's* annual [101 Top Products report](#) are determined by you, our readers. From security doors to metal ceilings, fabric ducts to rainscreen wall systems, linear drains to bacteria-killing LED lighting, these are the products that appeared in the [pages of the magazine](#) over the past 12 months that readers wanted to learn more about. The products were selected based on the number of reader service inquiries. *BD+C* editors selected a few of our favorites as well (marked "Editors' Picks").

The products are organized across eight categories: [Building Envelope](#) | [Building Systems](#) | [Flooring](#) | [Glass and Glazing](#) | [Interior](#) | [Plumbing](#) | [Structural](#) | [Windows and Doors](#).

Enjoy!

LIGHTING FOR REHEARSAL SPACE AT U. OF IOWA

Project: Voxman Music Building, University of Iowa, Iowa City. **Problem:** A 2008 flood ruined the Voxman Music Building, causing the university to rebuild and relocate the facility. The new space required functional, well-lit performance and rehearsal spaces. **Solution:** USAI Lighting's **BeveLED 2.1 Color Select fixtures** were incorporated into rehearsal spaces due to their high intensity and ability to withstand the constant and intense sound waves produced by the instruments. **On the team:** JLB LA (lighting designer).
