

USAI LittleOnes LED Lighting Fixtures

The USAI LittleOnes miniature downlighting products feature 1.25-inch apertures, and they provide the ability to deliver

Providing dealers and homeowners with a collection of small recessed lighting fixtures, USAI Lighting has released its LittleOnes MicroDoubles miniature downlights.

The N.Y.-based lighting manufacturer says that its latest product features 1.25-inch apertures and lighting output capabilities to produce up to 1,600 lumens. [USAI Lighting](#) states that unlike traditional lighting fixtures that are often bulky and cumbersome, the LittleOnes products are small to allow for their unobtrusive integration into residential and commercial environments.

USAI Lighting points out that its latest product line is available in a choice of styles, including Double Downlights, Double Adjustables, Double Wall Wash, and integrators can utilize a mix of the downlights and wall wash solutions to address a range of interior settings such as healthcare, hospitality and residential.

Some of the features the LittleOnes miniature LED lighting fixtures offer include smooth, flicker-free dimming down to 0.1%, adjustable spotlighting capabilities to highlight room elements such as artwork and room design

architectural features. Additionally, the new, small footprint LED lighting fixtures also provide standard output with one integral dimming driver per light fixture, and classic white and dim-to-warm+ LED color options.

Moreover, USAI Lighting emphasizes that it works with the International Living Future Institute to achieve Red List Approved Status for a number of its products that include the LittleOnes miniature lights.
