Aperture size
as little as a
gummy bear!

Hello, Tiny!

Meet the LittleOnes®

Who says TINY comes at the expense of performance?
USAI® Lighting is defying the standard on what is possible as we raise the bar in design and engineering with a one-inch recessed fixture family.

the LittleOnes® Zepto® 1"
the LittleOnes® Micro 1.25"
the LittleOnes® Micro Doubles 1.25" x 2

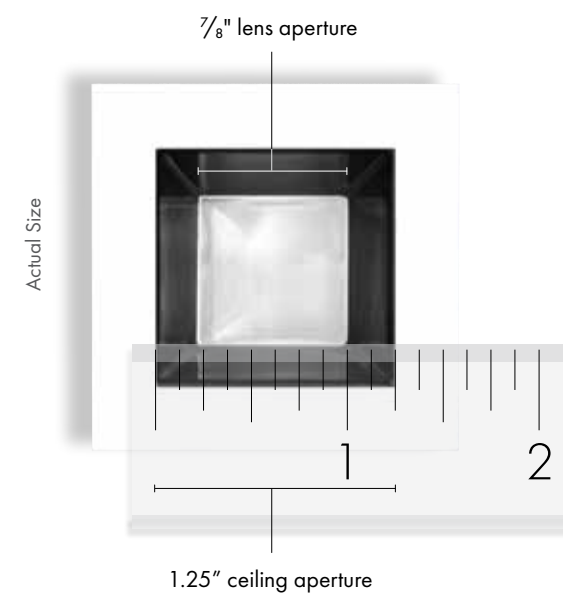

Minimal & Flexible

the LittleOnes® Zepto®

Don't be fooled by its 1" size and 3/4" aperture!
Like its metric system namesake, **the LittleOnes Zepto** is teeny tiny and POWERFUL. This guy packs a stealth punch with up to 1100 delivered lumens and literally off-the-charts glare control.

The result: Unparalleled performance with an ultra discreet trim aesthetic.

the LittleOnes® Micro

The LittleOnes Micro, sharing the BeveLED® family's iconic bevel trim aesthetic, is unique for its outstanding flexibility. With a full family offering, this 1.25" dynamo provides the ultimate versatility possible in an LED fixture this small. It's installable and serviceable from below, and its square or round shapes can work with most typical ceiling types, including retrofit applications. Layer with other BeveLED Family products to cover all of your project needs and retain a consistent room side appearance.

The Power of Tiny

Everything You Need to Light a Space

The best light sources reveal spaces, not themselves. USAI's the LittleOnes is ultra discreet with it's 1" aperture and minimalistic design. Powerful to illuminate with brilliance, yet incredibly quiet.

Hello, Power Couple!

The **LittleOnes® Micro Doubles** are a collection of tiny, 1.25" aperture duos that together deliver up to 1600 lumens while offering the family's signature glare control technology within a minimal design.

the LittleOnes® Micro Doubles Combinations

Experience twice the performance with the **LittleOnes Micro Doubles** featuring Double Downlight, Double Adjustable, Double Wall Wash or even a combination of Downlight and Wall Wash. Available in trimmed and trimless, round and square, with black and white finishes, there's an option for nearly every design intent. Choose combination finishes of black bevels with white flanges for visually quiet ceiling integrations.

Seeing is Believing

Here's what specifiers can expect from this tiny but mighty family's wall wash performance.

1 EXCELLENT LIGHT UNIFORMITY

Beautiful, smooth light illuminates the entire wall from ceiling to floor without shadows.

2 PRECISE BEAM CONTROL

Engineered to concentrate, spread and direct light in all the right places.

3 ULTRA LOW GLARE

Perfectly comfortable from every angle with no backlight.

4 BEST IN CLASS BEAM QUALITY

Wall Wash optical system in a tiny pack.

USAI's patented 5-part optical system delivers even light all the way to the ceiling line.

the LittleOnes
Zepto

low glare
50° cutoff

Comfortable light for
live, work and play
with low glare optics

Live Work + Play

The LittleOnes® tiny aperture can provide sufficient light levels for food preparation and dining at home.

Task Lighting: 50+ footcandles

Achieve 50+ fc on the workplane with a 12' ceiling height and a 4' x 4' on center spacing.

the LittleOnes® Zepto® Optics

Power and Comfort Together with Zepto®

the LittleOnes Zepto delivers an incredible punch from a miniscule aperture to illuminate any type of space, all while keeping ceilings quiet and comfort maximized with such amazing glare control that its glare level is not even measurable! Delivering up to 1100 lumens, this LittleOne easily provides the light you need for the most demanding of tasks and applications.

Quiet, Tiny & Powerful

The LittleOnes Micro makes it possible to light ceilings with smaller and more efficient light fixtures.

the LittleOnes
Micro

Experience General Illumination from a 1" Aperture

Imagine the unexpected. Use the LittleOnes® for ambient light on applications. Here's what specifiers can expect from the LittleOnes downlights.

1

DISCREET APERTURE SIZE

Virtually disappears into the ceiling plane with its minimalistic aesthetic.

2

HIGH PERFORMANCE LIGHTING

Usable amounts of light to effectively illuminate multiple types of applications.

3

ULTRA LOW GLARE

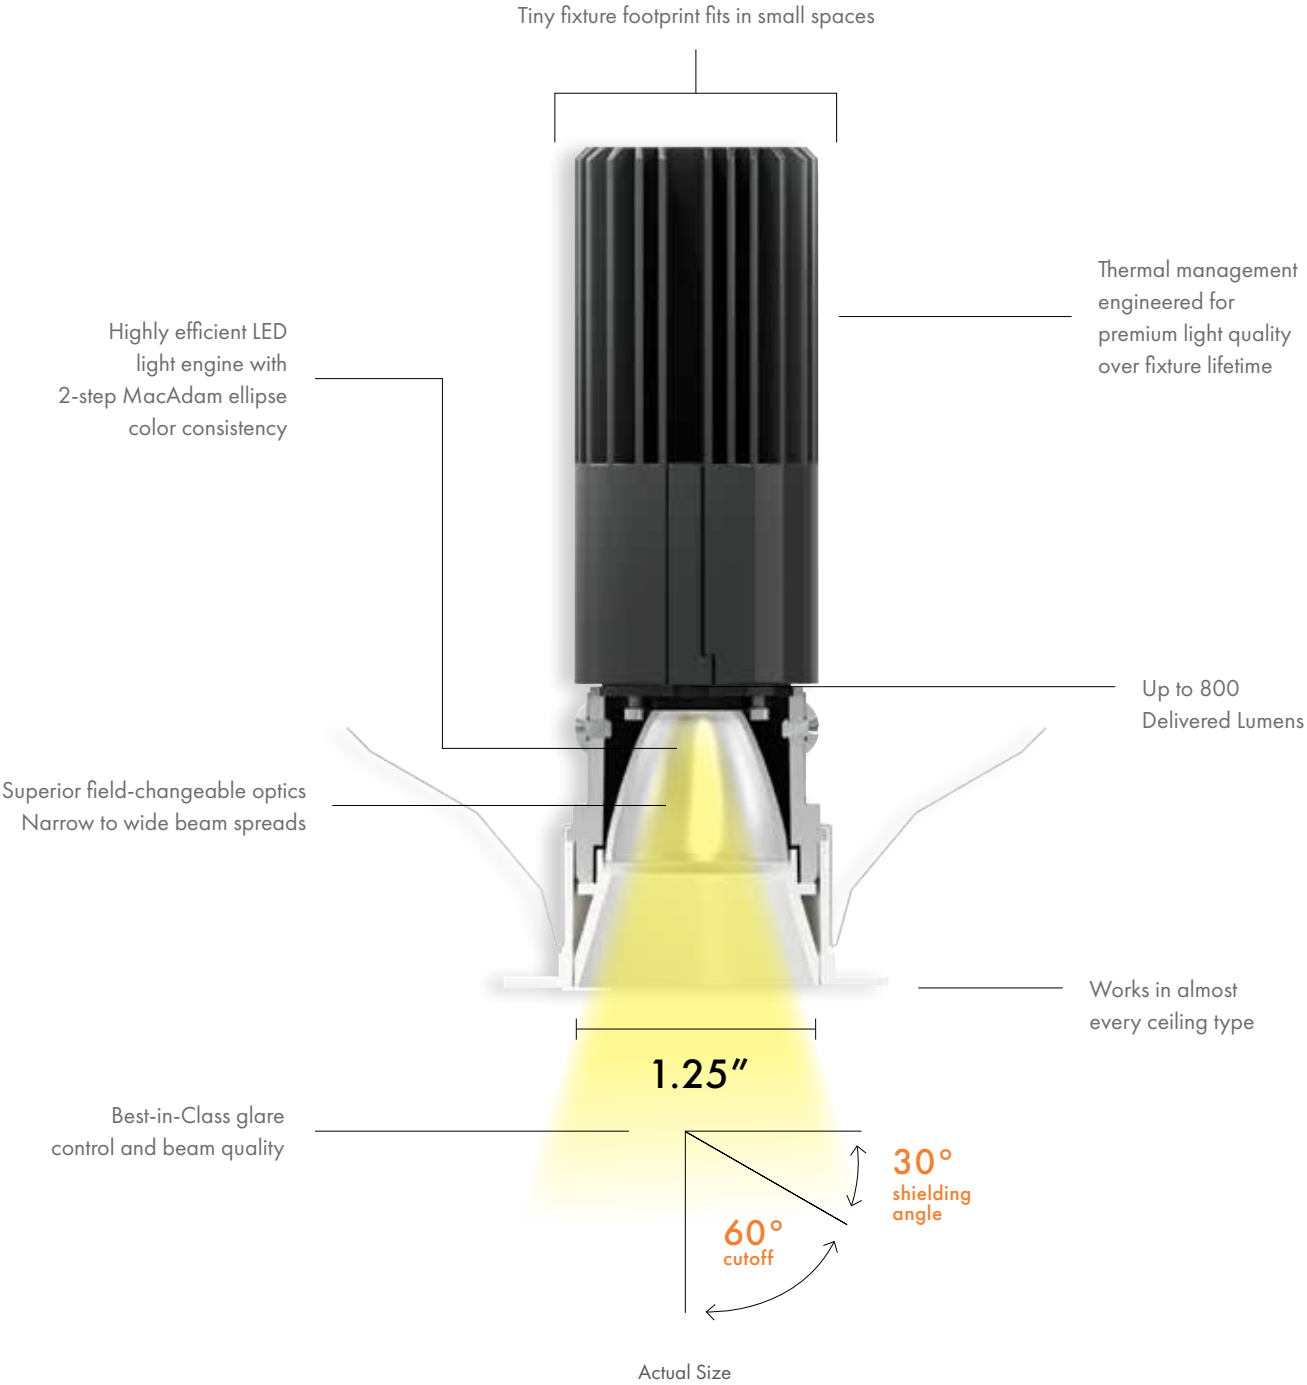

Black baffle trim options for the best glare control performance.

4

INTERCHANGEABLE OPTICS

Easily swap out optical components for field flexibility.

the LittleOnes® Micro Optics

Designing for the Details with Micro

Application efficiency and light where you want it - delivered in full. These tiny points of light deliver up to 800 lumens for the perfect, comfortable illumination in any project. Hex louver trims are also available to compliment the already comfortable, precision designed, low glare optics.

the LittleOnes® Zepto®

Service from Below

Zepto’s proprietary, patented design makes the impossible possible – allowing LittleOnes Zepto to illuminate with 15W of sheer power AND serviceable from below through a 1" aperture. The LittleOnes Zepto LED light engine and optics can be accessed and swapped out from below the ceiling plane in 3 easy steps, without any mess or disruption to the ceiling.

1 PULL
Pull down on LittleOnes Zepto trim using your thumb to remove trim

2 TWIST
Insert servicing tool to key into optics and light engine, twist counter-clockwise, then pull to remove from housing

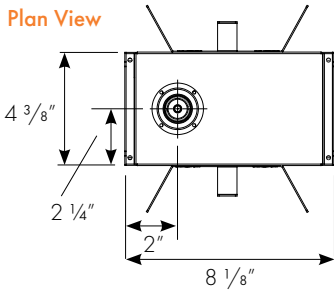

3 SWAP
Disconnect power, and quick connection wiring. Replace light engine and optic

Service from Below.

New Construction Housing (NC)*

*For use with remote power supply only

New Construction Rough-In

A rough-in housing option is required for all Zepto installations.

For **1** 15W and **2+** 11W LED options

Insulation Contact (IC)*

*For use with remote power supply only

Insulation Contact

An IC-Rated housing allows placement of the LittleOnes Zepto 1" in direct contact with insulation.

Title 24 JA8 Compliant versions available

the LittleOnes[®] Micro

Install & Service from Below

During renovations and projects with existing ceilings, simplicity is key. Why remove an entire ceiling when you don't have to? With the LittleOnes Micro 1.25" flanged fixtures, installation from below is simple. A tiny, beautiful, and serviceable light fixture is only three steps away.

1 CUT
Cut ceiling opening in drywall, wood, metal, or robust acoustical material with commonly available drillbit (for round) or saw (for square)

2 CONNECT
Connect trim to remote driver with a simple quick connector

3 INSERT
Squeeze spring clips together, and push LittleOnes Micro flanged trim into ceiling opening until the flange meets the surface

Install and Service from Below.

Retrofit (RT) (Flanged Only)*

Retrofit (Flanged Only)
the LittleOnes Micro 1.25" can be installed in existing ceilings for retrofit applications. Simply cut a hole in existing drywall or wood ceilings to install the flanged trim.

Install from Above. Service from Below.

**New Construction (NC)*
Rough-In**
(required for Trimless, Millwork, and ACT ceiling installations)

New Construction Rough-In
A rough-in housing option is available for all new construction projects and a variety of ceiling types, including acoustical ceilings

Install from Above. Service from Below.

**Insulation Contact (IC)*
Chicago Plenum (CP)***
 Title 24 JA8 Compliant versions available

Insulation Contact
An IC-Rated housing allows placement of the LittleOnes Micro 1.25" in direct contact with insulation, whether a flanged, trimless, or millwork aesthetic is desired.

Chicago Plenum
Our CP-rated rough-in housing satisfies Chicago's plenum requirements.

*Remote power supplies required for all LittleOnes Micro fixtures

Installation Made Easy with Remote Drivers

Optional USAI Enclosures

6 Driver Prewired Enclosure
Can power up to 24 LittleOnes fixtures

12 Driver Prewired Enclosure
Can power up to 48 LittleOnes fixtures

2 Ways to Work Remote

Multiple Dimming Choices. Multiple Dimming Choices. USAI's LittleOnes® are compatible with all common lighting controls; choose from 0-10V, Phase, EcoSystem, Lutron Athena, DMX, or DALI dimming.

High Output with 1 Fixture Per Driver

Dedicating one fixture per driver provides optimal performance and best possible delivered light output.

Standard Output with 2+ Multiple Fixtures Per Driver

Connect up to four light fixtures at a time to one dimming driver for efficient power distribution and cost savings.

* Max Distance 50-100 feet

USAI® Provides Remote Driver Applications Assistance

USAI offers application assistance for the configuration of remote drivers and remote driver enclosures. Contact your local USAI representative for additional driver layouts and different power requirements, or for custom configurations. Three easy steps to start.

1 PROJECT INFORMATION
Provide a fixture specification and a load schedule

2 USAI ASSISTANCE
USAI calculates driver quantities and optimizes enclosures needed

3 ORDER PLACEMENT
Place an order matching the USAI remote driver submittal for trouble-free coordination

FAQs

Q: Do the LittleOnes always require remote drivers? Where is the ideal location for remote drivers and how far away can I position them?

A: Due to the LittleOnes' miniscule size and tiny 1" apertures, it is not possible to access dimming drivers for service from below the ceiling. All of the LittleOnes are available with remote drivers which can easily be accessed in service panels or electrical closets, and they can be located up to 100 ft away depending on wire gauge used. We do have one housing option with Zepto that can house an integral driver, but this fixture would require above ceiling access to remove that driver from the housing for service.

Q: Which controls systems are compatible with the LittleOnes?

A: As with all USAI Lighting products, the LittleOnes are compatible with every major architectural controls system you could choose to use, including 0 - 10V low voltage dimming, line voltage phase dimming, and digital dimming protocols such as DMX, DALI, Lutron Athena and Lutron EcoSystem.

Q: How well will the LittleOnes light my walls? How close do they need to be?

A: Despite their tiny size, the LittleOnes are outstanding in wall wash applications, providing perfect uniformity from floor to ceiling. For best results, we recommend placing them 24" from the wall and no more than 18" apart from each other.

Q: Can I place the LittleOnes in wet locations such as showers and outdoor covered spaces?

A: The LittleOnes Zepto and Micro downlight and wall wash fixtures are UL dry/damp/wet location rated. The LittleOnes Micro adjustable fixtures are only dry/damp rated.

Q: Can I service the LittleOnes LED and optics from below?

A: Yes! If a change is desired in LED color or optics and beam spread, you may need to access internal components. USAI's engineering has made this access easy and painless.

Q: How far apart can I space the LittleOnes and still light evenly?

A: Even though they're only 1" in size, we have found that the LittleOnes can be placed up to 4', 5', and 6' apart while still delivering useful light and great uniformity. If you're not sure, you can always contact USAI for help with applications calculations for your project.

Q: What is the maximum ceiling height recommended for the LittleOnes?

A: The answer to this question depends on how much light you need, and how closely you are placing the LittleOnes to each other. We have found that the LittleOnes can provide beautiful illumination in 8', 10', and 12' ceilings. When ceiling heights get to 14' and higher, consider using other USAI products with larger apertures and more light output; we offer a full family of companion products for the LittleOnes with similar trim aesthetics - so they look great together.

Q: How do I use the LittleOnes as emergency fixtures?

A: The LittleOnes can be specified with a remote emergency power module. Simply use the One Fixture per Driver ordering tables to specify the LittleOnes light fixture of your choice, and then specify a remote dimming driver with the EM option. All remote dimming drivers with the EM option require a remote enclosure. Two or more fixture per driver options can be used as emergency fixtures with the use of inverters. See spec sheets for details.

Q: When should I use the install from below option vs install from above?

A: The LittleOnes family is designed to be as flexible as possible for all installation types. The install from below option of the LittleOnes Micro downlight can be utilized when installing in a drywall ceiling that is already in place. If installing in ACT, Millwork, or for a spackle-in trimless aesthetic the LittleOnes offer install from above options.

Q: In what ceiling types do the LittleOnes work?

A: The LittleOnes family works in almost every type of ceiling imaginable, including but not limited to: drywall, plaster, wood, tile, acoustical tiles, metal panels, and more. The LittleOnes also offers IC-rated and CP-rated housing options to meet specific construction requirements.

Q: How do I mix and match the LittleOnes Micro Doubles with other LittleOnes in my project?

A: The LittleOnes Micro Doubles can be specified as a double downlight, a double wall wash, a double adjustable, or a combination fixture of one downlight + one wall wash. This versatility enables multi-functional solutions in tight spaces, such as at the end of a corridor where both a downlight component is needed to light the floor and a wall wash component is needed to light the end of the hall. Double adjustable fixtures are ideal for achieving consistent, uniform fixture-head to fixture-head on center spacing with flexible aiming and adjustment features for highlighting artwork and objects of interest. See spec sheets and app guide online for more examples of all the great ways to use this product!
